

## Seminar for Class X Science Students

DPS Megacity has always been at the forefront when it comes to student's welfare.

Upholding our values, we jointly conducted a seminar for our class X science students and their parents on 7<sup>th</sup> February 2015, to address the career needs of students. An integrated program was introduced, by Mr Malaya Khandelwal of ThinkC, who is a well known veteran in this field and has been producing the best results out of this city year after year. An alumnus of IIT M and Carnegie Mellon University, Mr Khandelwal brought in his rich set of experiences guiding our students towards collective learning and excellence in their careers pertaining to medical and engineering. Our principal ma'am was an active part of the discussion, addressing queries of more than 200 parents and students. It is the first time ever in the city that a school has taken an initiative of such kind to help their students excel both in boards and national level competitive exams.
