

Guidelines for Interaction (2027 - 28)

Class: Nursery

Young children learn best from things which they are familiar with and when they enjoy themselves. Learning and play are the two facets of reality. In the formative years between (0-6) children must be in an environment that enhances their major domains of growth (physical, motor, social, emotional and cognitive). We at DPS Megacity channelize every child's natural desire of play into methods of learning, making it a pleasurable experience for them. Our goal is to provide them with a stimulating environment for their holistic development through activities related to FLN.

When your child comes for the interaction he/she will be given an opportunity to interact and can sing common nursery rhymes, identify common objects, fruits, vegetables, animals, colours and play.
